

DR. JOHN A. FERULLO

YOUR DOWNTOWN DENTIST

...invites you to participate with us this February
in Dentistry has a Heart month.

Discover the link between oral health and heart disease.
Prevention and good oral hygiene are critically important.

- 1 of 2 women will die of Cardiovascular Disease.
- Chronic inflammation increases risk of Cardiovascular Disease.
- Periodontal disease is the number one form of chronic inflammation.
- Inflammation and infection create C-Reactive Protein from the liver which lines the arteries causing atherosclerosis, clots, stroke and heart attacks.
- Heart disease is preventable.
- Make an easy commitment to your health. Brush, floss and see your dentist as prescribed. Follow their recommended treatment to avoid periodontal disease.
